Do It
Think About Doing It
/dev/null

- HTTP access to kb using standard query languages (rdql, etc.)
- Locking
- Database inclusion
- Hybrid project inclusion
- Read-only mode – simplify UI – improve performance
- Integration with eclipse
- Database connectivity widgets
- Edit included projects
- Better way to show/hide tab plug-ins
- Smarter display slots – specify preferred
- Search boxes detect key strokes – filter contents of UI
- Edit properties of multiple instances at once
- Change PPRJ format to XML

- Better code documentation
- Make it easier to open OWL file in Protégé
- Resolve conflicts in PPRJ files stored in source control
- Make it easier to edit LAX file
- Set memory, etc. for next launch of Protege
- Nice beach at next conference !
- Remove console window in favor of ?
- Give line numbers for parsing errors
- ontpolicy file problems
- Relative paths for included projects
- Put table widget to bed

- UI access to “jaring” multiple projects
- Make UI more browser-like
- Make Protégé community of practice more obvious
